

**VOBLING™**

an **Occupli** company

# **WHEN REALITY IS NOT ENOUGH**

**Since 2015, we empower people to obtain critical skills to prevent, prepare for, and handle dangerous situations through immersive digital training.**

**We transform traditional safety training into accessible, intuitive, and realistic learning experiences. Trusted by organizations worldwide, we set a new standard for quality, transparency, and accessibility in safety training.**

**Invented in Sweden.**

# VR FIRE TRAINER™

Digital extinguishing exercises with VR are approved in Hot/Flammable Work courses in many countries including Sweden and Norway.

RECOMMENDED BY  Brannvernforeningen

## FULLY IMMERSIVE

The user will be immersed in the experience of fires, realistic fire spread, feel the stress of the alarm, see the smoke formation and then use the physical extinguisher to put out the fire in VR.

## FIRE SIMULATION

Using a voxel based physics system, fire spreads realistically in different materials and reacts naturally to different fire agents.

## MIXED REALITY

A real fire extinguisher is integrated into the solution, the user must use the extinguisher nozzle to aim and press the extinguisher handle to release the agent, in order to put out the fire in VR.

## EFFICIENCY

This combination of physical equipment and immersive software makes it possible to train multiple fire scenarios within minutes.

## ENVIRONMENTS

Various highly immersive and 3D surroundings that engage the user in a realistic fire scenario. We have the most common spaces where you are most likely to encounter a fire.

## PERFORMANCE

Measuring the user's training performance in each fire scenario, time to extinguish, remaining extinguisher medium and how much smoke the user inhales.

# A SMARTER WAY TO TRAIN

The VR Fire Trainer is a fully mobile digital fire safety solution that simulates real fire scenarios. Integrated with a real extinguisher, it provides a hands-on experience anytime, anywhere.

**BRIEF INTRODUCTION**

# FIGHT FIRES WITHOUT FIRE

## COST EFFECTIVE AND ACCESSIBLE

Train more people for less with the VR Fire Trainer, the most affordable fire safety solution. Practice anytime and anywhere without weather restrictions, travel, or extra materials.

## SAVE LIVES

Learn to fight fires safely in a realistic and risk-free environment. Practice different fire types and extinguishers while receiving real-time feedback to improve your response.

## ENVIRONMENTALLY FRIENDLY AND SUSTAINABLE

No chemicals, no waste, no pollution. The VR Fire Trainer is the safest and most sustainable way to learn fire safety. Reduce emissions and costs with our fully digital training solution.

## LEARNING QUALITY

Track performance, receive insights, and improve memory retention for faster and more effective emergency response.

# ***WE ARE FIRE TRAINERS***

“

It's not just about knowing the steps. It's about making sure those steps are automatic under pressure. We want staff to feel comfortable using an extinguisher so that in an emergency they don't freeze. The VR Fire Trainer helps bridge that knowledge gap in a way that is both sustainable and cost-effective. This training is building confidence. Before, many staff were hesitant to even touch a fire extinguisher. Now, they know exactly what to do. And in an emergency, that confidence could make all the difference.

- Mike Hoffman, Fire safety consultant, Covenant Health
